Recommended Product Applications

The following Halo application chart is provided to aid in understanding where Halo Flooring products are recommended for use. This application chart is a subjective recommendation and is predicated upon the adherence to proper installation techniques; specific location of installation; level of foot traffic; and the type and professional level of maintenance practiced on-site.

Halo Floors pass ASTM Test Method F 925, Resistance to Chemicals. F 925 calls for exposure to chemicals for one hour. The chart above shows results for the required 1 hour and even more severe testing protocol over a 24 hour period. Halo Floors are tested without any applied sealers or floor finishes and are cleaned with a cotton cloth after exposure. For the most accurate results, CBC Flooring recommends using the customer's chemicals on actual product samples that have been treated with the maintenance products to be used on the finished floor. Halo Floors are readily available for testing from CBC Flooring.

Environmentally-responsible and backed by the Halo history of outstanding performance our Stones & More is the perfect choice for high traffic areas.

Product Characteristics

Standard Spec	ASTM F 1700
Classification	Class III Type A & B
Overall Thickness	3.0 mm (0.12")
Wear Layer Thickness	0.7 mm (0.028")
Nominal Dimensions / Packaging	18" x 18" (457 mm x 457 mm) 20 pc/ctn (45 sf/ctn)
	12" x 24" (305 mm x 610 mm) 20 pc/ctn (40 sf/ctn)
	24" x 24" (610 mm x 610 mm) 8 pc/ctn (32 sf/ctn)

Fire

ASTM E 648 Critical Radiant Flux	Class 1 (> 0.45/sq cm)
ASTM E 662 Smoke Generation	< 450

Test Performance

ASTM F 1700 Standard Specification for Solid Vinyl Floor Tile	Meets or Exceeds Requirements
ASTM C 1028 Static Coefficient of Friction	≥ 0.5 ADA Compliant
ASTM F 970 (Modified) Static Load Limit	2,500 PSI
ASTM F 925 Chemical Resistance	Passes
ASTM F 137 Flexibility	Passes
ASTM F 1514 Resistance to Heat	Passes
ASTM F 1515 Resistance to Light	Passes
CA 01350 VOC Emissions	Passes
